RECOVER: Researching COVID to Enhance Recovery

Long COVID is real. Millions of people who had COVID-19 still have symptoms lasting months or years.

We created RECOVER to understand, diagnose, prevent, and treat Long COVID and help people who are suffering.

LEARN MORE ABOUT LONG COVID

The **RECOVER** Initiative

Millions of Americans suffer from Long COVID. This disease affects each person differently, so no single research study can provide all the answers to Long COVID for everyone. The National Institutes of Health (NIH) created the RECOVER Initiative to find answers across many different types of research studies.

RECOVER brings together clinicians, scientists, caregivers, patients, and community members to understand, treat, and prevent Long COVID. We've created the world's most comprehensive and diverse group of Long COVID study participants.

Together, we are working to understand, treat, and prevent Long COVID.
